

Simplicity™ Controls by York®

AN INGENUOUS WAY TO GROW YOUR BUSINESS.

- Engineered for ease of set-up, programming, and monitoring.
 - Reduce the frequency of nuisance service calls.
- Increase customer retention and profit from remote service contracts

It's Time to Get Comfortable™

Until Now, It Took a Certain Talent to INTRODUCING SIMPLICITY

Engineered to make life simple—for you and the building manager.

Remember when you had to have a genius on board just to figure out HVACR control boards?

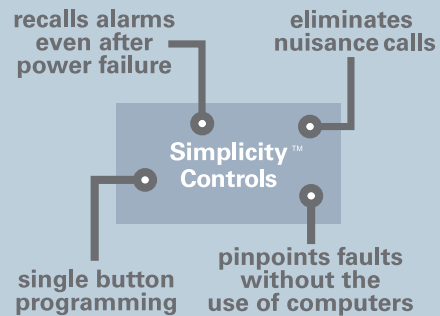

Today, York® and you can turn virtually any qualified HVACR technician into a controls whiz kid — while turning up new business opportunities.

With the built-in brilliance of the York Simplicity™ Controls System, you get a clear-cut, yet sophisticated, controls solution.

One that's engineered for ease of set up, programming and monitoring.

York Simplicity Controls continuously inform the building manager on the health of the HVACR system. Pinpointing small faults before they can become calamities. Reducing the frequency and expense of nuisance service calls. And making life simpler.

York® Simplicity™ Controls Systems are standard factory-installed equipment on our high-demand Predator® line, as well as most York split system rooftop units. And, they'll be available on all models soon.

Simplicity™ Controls System

- Single button programming
- Two-stage independent control on all dual-circuited models
- 5-minute Anti-Short Cycle Delay
- Alarm recall — even after power failure
- 3-minute minimum compressor run time
- Circuitry to control two independent air handling units
- High and low pressure controls for each circuit
- Pre-wired for smoke detector
- Gas monitor for heat operation
- Low voltage protection for contractor
- “Quick Connect” options for easy fitting of field-installed accessories
- Leading BAS compatibility
- Free local networking carries all alarm and diagnostic data directly to an on-site PC
- With available York Wireless™ all alarm and diagnostic data available virtually anywhere in the world.

o Understand Control Systems. SIMPPLICITY™ CONTROLS BY YORK.®

Simplicity Controls is Compatible with Most Major BAS Systems.

Simplicity Controls are factory-mounted and wired to be compatible with these BAS Systems:

- Novar
- CPC
- Honeywell
- JCI

Additional BAS compatibility is being added all the time. Contact your York representative for updates or to determine when compatibility with your current BAS system will be available.

Simplicity Plus™—Another Way York Puts You In Control.

As an alternative to conventional BAS systems, we also offer the York Simplicity Plus™ Control System. More versatile and powerful than a programmable thermostat, Simplicity Plus provides a full range of programable HVAC controls at the touch of a keypad.

With Simplicity Plus, building owners and operators can network single-zone—constant-volume or multiple-zone—constant-volume or VAV units or a combination of any or all. In addition, Simplicity Plus can control lighting and exhaust fans.

With Simplicity Plus, the primary controller comes to you factory-mounted. It works in concert with the Simplicity Control board and is backward-compatible with Meridian™ and E-Zone™ systems.

Which means it protects your investment in terms of long-term parts supply and availability. Simplicity Plus, another important part of the complete York Controls offering!

The York Simplicity Plus™ Control System is a versatile and powerful alternative to traditional BAS systems. It works in concert with the Simplicity Control board and protects your investment with long-term parts availability.

The York Simplicity Controls System is good news for HVAC contractors who thought controls jobs were only for the big boys with dedicated controls engineers. Do it yourself and grow your business, with York Simplicity Controls.

Grow Business with Remote Service Contracts

...YORK IS COMMITTED TO HELPING YOU

York Wireless™ Remote Monitoring

York Wireless™ Remote Monitoring provides 24/7 real-time worldwide monitoring of Simplicity-controlled York light commercial units. Without investing in building automation systems (BAS), dedicated phone lines, central monitoring systems or special training.

It's a system that harnesses Internet server and wireless technologies to communicate instantly. Building owners, facility managers or service providers are given early system warnings via pager, cellular phone, fax or email — anywhere, anytime.

York Simplicity controls make York Wireless a simple "Plug and Play" technology. To aggressive HVACR contractors, York Wireless could mean "Plug, Play...and Profit."

Remote Monitoring Service Contracts

Together, Simplicity Controls and York Wireless can put you profitably into the Remote Monitoring Service Contracts business.

It's fast, easy and requires virtually no investment on your part. You increase customer service and retention, while improving your efficiency.

When a problem occurs, the York Wireless alarm will come directly to you, you'll instantly know the location, equipment, and alarm code causing the disruption.

Immediately, you'll be sending the *right* service technician with the *right* skills, tools and parts, reducing downtime and costly customer business interruptions.
