APPLICATION ENGINEERING BULLETIN Number # AE-012-08

■ **TOPIC:** Missing XML file in simplicity software

■ **SCOPE & PURPOSE:**

- To understand the operation of Simplicity pc without this file

■ **CONTENT:**

- This bulletin is to cover the addition of the file to the existing Simplicity PC operational file

■ **SUMMARY/CONCLUSION:**

- It has come to light that Simplicity PC is missing a XML file required to look at the new VAV / 4 stage board connected to the 1A board. Without this file you may not communicate with the control at all. The file is attached to this document. To install: go to my computer ,c drive, program files, SimplicityPC and click and drag the file into the folder and then it will communicate. File is located in Application in UPGNET.

■ **AUTHOR:**
