

YORK[®]

affinity series

80% UP TO 95% FAMILY OF FURNACES

There's no place like home. Or to be exact, there's no place like your home, the one spot that reflects your style and your personality. So why not choose your furnace the same way you would any other major appliance, by demanding good looks and innovative design. It's possible with York's Affinity Series Furnaces, perhaps the only line that's been engineered from the ground up and designed to give you more comfort and options than ever before.

Custom comfort.

Only Affinity Furnaces offer you variable speed ClimaTraK™ technology, so heating and cooling settings can be matched to your region's unique climate and conditions. That means less humidity, more comfort.

Efficiency stars.

York's Affinity Series meets the EPA's strict new guidelines for efficiency. And all 92%+ AFUE furnaces carry the Energy Star designation, meaning they reduce energy bills and protect the environment.

Shhh.

Some things are better seen but not heard. With reinforced cabinets and a patented design, your Affinity Furnace operates incredibly quietly. You enjoy silence both day and night.

All this and handsome, too.

At York, innovation means our furnaces have been engineered from the ground up to combine efficient performance with exceptionally attractive cabinets—the perfect complement to your entire Affinity heating and cooling system.

The options that make everyone comfortable.

At York, we let you choose the model and the features that make sense for your home and family. We've created our Affinity Series Furnaces around basic principles — energy-efficiency, long-lasting performance, handsome style — but we've also recognized that you want choices.

Furnaces that modulate in 1% increments for constant comfort throughout the day and night. Or choose Affinity two-stage furnaces, designed to operate at a low, more energy-saving level but will kick into a second stage for extra heating when outside conditions grow bitter cold. Or you can opt for Affinity single-stage models that deliver efficient, dependable performance.

PREMIUM • 9.M & 9.C SERIES FURNACES

Modulating Furnaces that feature a constant-speed blower for superior comfort, or a variable-speed blower for comfort and efficiency.

BEST • 8.V & 9.V SERIES FURNACES

Two-stage, variable-speed designs with an electronically commutated motor (ECM) for impressive humidity control, noticeably quieter operation, and superior energy efficiency.

BETTER • 8.T & 9.T SERIES FURNACES

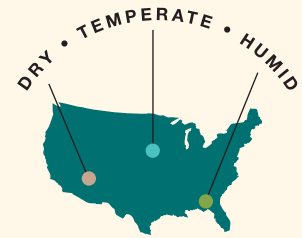

Two-stage designs promote more even temperatures with increased air circulation, reduced noise levels and fewer stops and starts for longer furnace life.

GOOD • 8.S & 9.S SERIES FURNACES

Single-stage, direct-drive blower designs send warm air to every room in the home while helping reduce energy costs up to 30% when compared to older furnace models.

State-of-the-art technology, specifically for your state.

Only the Affinity Series offers ClimaTraK™ technology. So, when paired with an Affinity Air Conditioner, your York Dealer can customize settings to match your region's climate and conditions. That translates into efficient, constant indoor comfort whether you live in a dry, humid or temperate area.

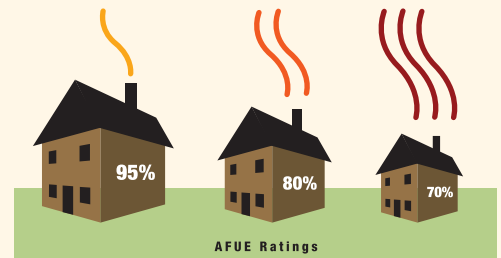

Customize settings to match your region's climate for added comfort and efficiency.

New designs, new efficiency standards.

York's Affinity Series meets strict new Environmental Protection Agency guidelines for efficiency. In fact, many of our furnaces carry the EPA's Energy Star  designation, meaning they use less energy, reduce your heating bills and help protect the environment.

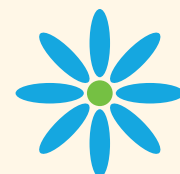

We also give you choices. Our mid-efficiency furnaces are rated 80% AFUE, a designation that means 80% of your energy costs are devoted to warming your home with little wasted heat. And our Affinity Modulating Furnace is rated 95% AFUE, meaning minimum wasted heat and qualification for federal energy tax credits.

Higher AFUE (Annual Fuel Utilization Efficiency) ratings mean less wasted energy.

Clearing the air.

At York, we think comfort goes beyond simple temperature control. That's why we offer so many new ways to improve your home's air quality. From ventilation systems to electronic air cleaners and more, York's Total Comfort System® approach means total peace of mind. You may never have to worry about unclean air, hidden mold or energy costs again. Isn't that a breath of fresh air?

York's Total Comfort System® approach means clean air and total peace of mind.

Suddenly, state-of-the-art comfort has never looked so good.

Sure, the Affinity Modulating Furnace has a sleek, modern, uncomplicated look. But the really good news is that it has a sleek, modern, uncomplicated way of making your home noticeably more comfortable while saving on energy costs. It also may be the only furnace that operates so simply. All this, and a Good Housekeeping Seal of Approval, too. That should make everyone a lot more comfortable.

Affinity Series Furnaces

HIGH-EFFICIENCY CONDENSING FURNACES

How to stay comfortable for years to come.

York and your York Dealer are proud to offer the YorkCare Comfort Plan. It's designed to maintain your system as well as your peace of mind. With up to 10 years of total coverage available, you can ensure your unit is effective and efficient for years to come. What's

more, your York Dealer offers maintenance agreements that provide upkeep while maximizing the warranty provisions. Ask about the YorkCare Comfort Plan. A little extra coverage is always a comforting idea.

Long story short: the history of York design.

You've probably enjoyed York engineering for years without even knowing it. We have, after all, designed and implemented heating

and cooling systems in some the world's most famous structures, including the U.S. Capitol

building, India's Taj Mahal, the Sydney Opera House, the entire U.S. Navy

nuclear submarine fleet, and even venues such as your local mall and corner bank.

■ There's a reason people trust us

with the big jobs. We've been doing this a long time. Over 130

years, in fact. In that time, we developed the first successful room air conditioner and cooled the world's first theater, hotel and office building.

We're constantly leading the industry in our design and our technology. And our commitment has earned our products

the Good Housekeeping Seal of Approval. No matter what the scale, chances are we've developed an efficient, durable and effective solution for it.

■ Which is all a way of saying this: You can depend on York to give you the choices you're looking for and

the designs that will keep you comfortable year-round, year after year.

■ Want to know more? Contact your York Dealer. He's got 130 years of innovation to tell you about.
