

It's the end of gray.

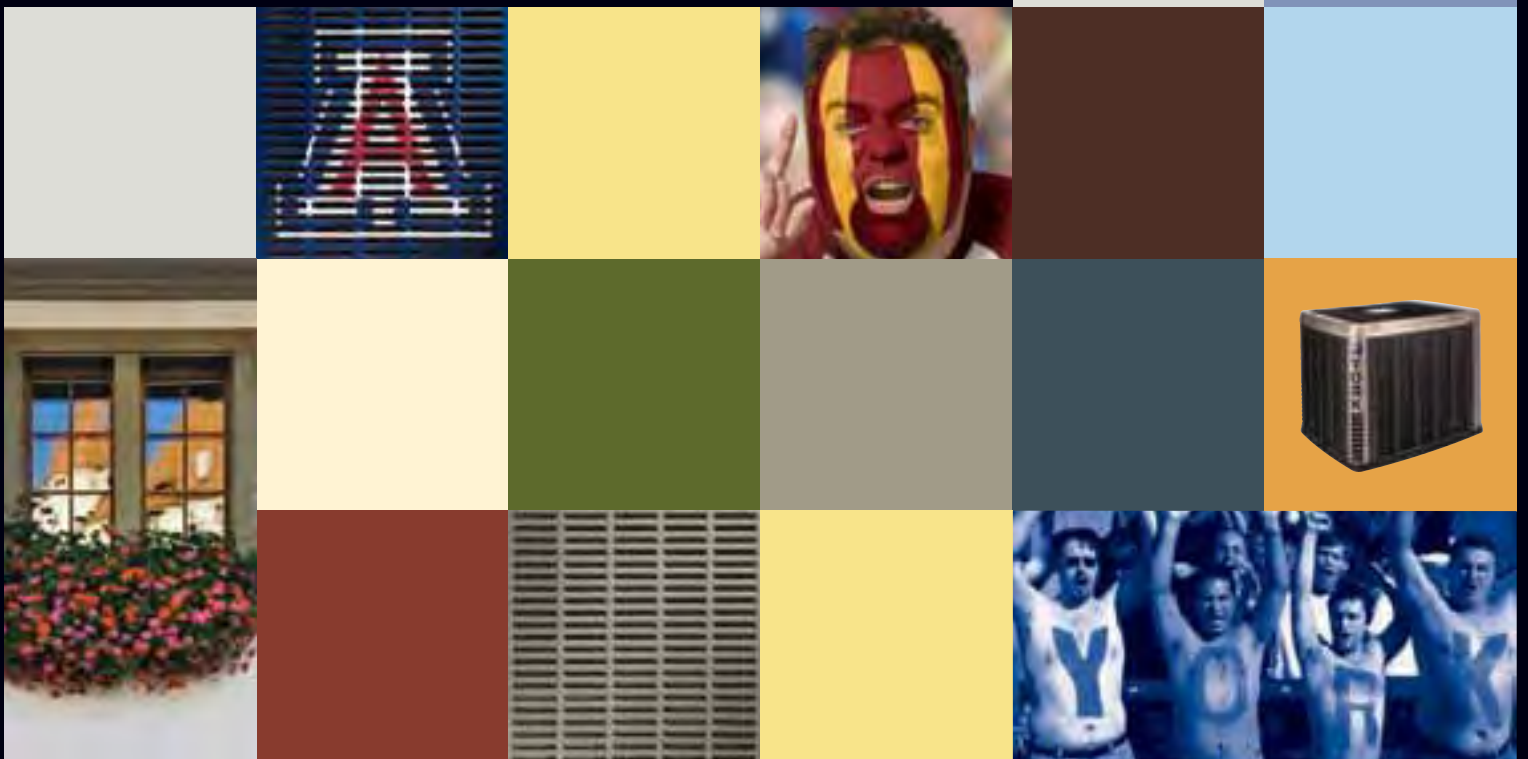

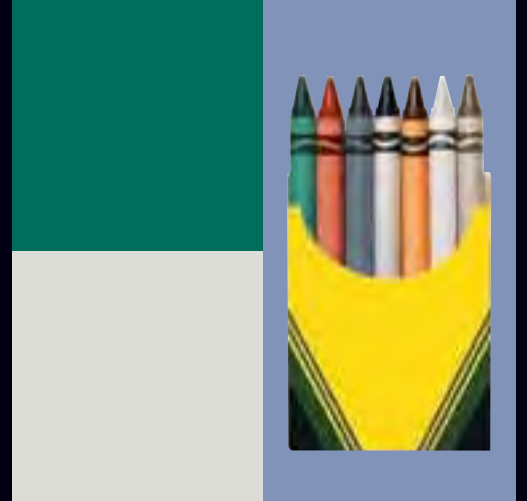

(Unless you like gray.)

It's the beginning of your imagination.

Finally, someone understands your style. Now, the same individuality and spirit you bring to every room in your home can be reflected even in your heating and cooling system. Only York's Affinity Series Air Conditioners and Heat Pumps have been engineered from the ground up and molded by modern design aesthetics. So you can choose models that are genuinely attractive, customized to match the colors of your home, your garden, or your school, all while delivering quiet, long-lasting, efficient performance.

You have a flair for color. Why keep it hidden?

Only York's Affinity Series Air Conditioners and Heat Pumps give you a palette of seven designer colors to choose from. So you can select the color that best complements your home. Never again will you feel the need to hide your system.

But there's much more to the Affinity Series than mere good looks. York also offers models that meet or exceed the government's 13 Seasonal Energy Efficiency Ratio (SEER), a new standard that translates into environmentally friendly and efficient performance.

CHOCOLATE

CHAMPAGNE

TERRA COTTA

STONE

GUNMETAL

JET BLACK

BERMUDA

This is the kind of innovation people just go crazy for.

The Affinity Series even lets you display your favorite school colors with interchangeable college panels. Choose from Ohio State, Florida, Washington — over 70 schools in all. Since they're painted with automotive-grade

powder coating, Affinity Series colors are as long-lasting as your spirit. But here's the highlight: Inside, our exclusive design is noticeably quieter and more efficient, so your energy costs can be noticeably lower.

Affinity Heat Pumps: the right solution in the right climate.

If you live in a region with mild winters, or where electricity is more affordable than gas or oil, Affinity Heat Pumps may be a more cost-efficient choice. These all-in-one heating and cooling designs operate like an air conditioner in the summer, then

reverse operation in winter, keeping your home cozy, warm and free of cold drafts. And with our exclusive Hybrid Comfort System, you can shift from electricity to gas and back for the most efficient heating you've ever experienced.

Clearing the air.

At York, we can help improve your home's air quality. From ventilation systems to electronic air cleaners and more, York's Total Comfort System®

approach means total peace of mind. You never have to worry about unclean air, hidden mold or energy costs again.

How to stay comfortable for years to come.

With up to 10 years of total coverage available, the YorkCare™ Comfort Plan can ensure your unit is effective and efficient for years. And your York

Dealer offers maintenance agreements that provide upkeep while maximizing your warranty provisions.

Long story short: the history of York design.

**OVER
130
YEARS
OF DESIGN
INNOVATION
AND COMFORT**

There's a reason people trust York. In over 130 years, we've led the industry in design and technology. That includes developing the first successful room air conditioner, implementing heating and cooling systems in the U.S. Capitol building, India's Taj Mahal, the Sydney Opera House, the entire U.S.

Navy nuclear submarine fleet, and more. York products have even earned the Good Housekeeping Seal of Approval. So you can depend on York to give you the choices you're looking for. Want to know more? Contact your York Dealer. He's got 130 years of innovation to tell you about.
