

## Protection you can count on

### What it is:

The Frick® Plus 3 warranty is additional protection that you receive on your refrigeration products when you purchase a complete Frick® Bill of Material.

### How it works:

By purchasing the complete bill of material from Frick®, you automatically qualify for the extended 3-year warranty.

### System Installation:

Because the installation of the equipment is just as important as the quality of the product, to qualify for the warranty, the project must be installed by a Frick® Factor.

### Project:

To qualify for an extended warranty, the project must include at least three major product groups – compressors, condensers, air units, AcuAir®, vessels, and/or controls. All of the products on a project must be purchased for the warranty to become effective (controls are optional for the warranty).

### System Start-up:

The compressors must be commissioned by a factory-authorized Frick® or Frick® Factor start-up technician.

### Maintenance:

All of the products must be maintained in accordance with the recommended maintenance schedule.

### Compressors:

- Compressors must utilize Frick® Oil.
- The oil must be analyzed with an oil sample program submitted to Frick® at recommended intervals
- Vibration reports must be taken at recommended intervals and available upon request.
- Optional on-board PhD monitoring may be utilized in lieu of vibration reports.
- Frick® SuperFilter™II must be utilized and changed at recommended intervals.

### Other Products

- Must be maintained in accordance with appropriate service manuals

### Your added cost:

Nothing!

# Frick® Plus 3 Warranty

## Comments:

The Frick® Plus 3 warranty covers defects in material and workmanship for three years from the date of start-up or 42 months from the date of shipment, whichever occurs first. It covers parts only FOB factory. Labor to change the parts is not paid.

Compressor motors and starters include a two year from start-up (30 months from shipment) warranty in lieu of the three-year warranty unless additional coverage is purchased prior to unit commissioning.

Compressor motor variable-speed-drive controllers (VSDs) include a one-year from start-up warranty (or 18 months from shipment).

Normal wear and tear maintenance items such as belts, oil, and filters are excluded.

## What is covered:

- Compressor packages including the compressor, control panel, oil separator, package safeties, etc.
- Condensers including the coil bundle, fans, motors, pumps, drives, control items, VSDs.
- Air Units including the coils, fans, motors, VSDs, controls.
- AcuAir® including coils, fans, fan drives, burners, controls.
- Vessels include refrigerant pumps and controls.
- Control system components are included as well.
