## SERVICE BULLETIN

SUPERSEDE  
BULLETIN:

DATE:

PAGE: OF:

SUBJECT:  
COUPLING GREASE

Installation, repair and service and equipment referenced in this Service Bulletin should be undertaken only by qualified persons. Carrier Corporation (1) makes no representations or warranties, expressed or implied, concerning the accuracy, completeness or right to use the information contained herein, and (2) disclaims all liability for injuries, damages, infringements and other losses which may arise on account of, or which may result from, the use or application of any information, method or apparatus disclosed herein.

### PURPOSE

To advise that the Power Transmission Division of Koppers Company is custom manufacturing a new blend of grease for use with Koppers and other manufacturers' couplings.

### MACHINES AFFECTED

17 Series couplings, compressors, gears and drives

### RECOMMENDATIONS

Carrier suggests that only the highest grade grease (KHP) be used to avoid confusion between high and low speed applications and for the best results.

This grease is recommended because it:

- 1) is a high grade grease.
- 2) reduces the variations in the quality of different manufacturers and packagers of grease.
- 3) reduces complaints about using grease products manufactured by one company at a competitor's company; i.e., Texaco grease in a Gulf refinery.

This grease can be ordered from the Replacement Components Division under Carrier Part Number 17DK680-001.
