

Title: **TERRY STEAM TURBINE, TERRY GEARS, TURBODYNE TURBINES**

Number: C8802

Date: 2/15/88

Supersedes: NEW

Date:

Models Affected: 17 SERIES OPEN DRIVE WITH STEAM TURBINE
DRIVERS OR GEARS (MOTOR-DRIVEN)

Purpose: This bulletin is to inform all personnel involved with repairs and replacement of parts that the Terry Corporation located in Hartford, Connecticut, has been closed down.

Explanation: A joint venture parent company has taken over the responsibility for the repair, parts, and service. The "new" company is called "DRESSER-RAND" located in Wellsville, New York. Actually the new location is at the "old" Turbodyne Turbine Plant. The sales of any new turbines of either "TURBODYNE" or "TERRY" design will now be known as "DRESSER-RAND" machinery. This is a combined firm of the DRESSER CORPORATION and the INGERSOLL-RAND CORPORATION.

Action: If parts, service, or factory repair are required, contact is to be made by calling your local DRESSER-RAND representative (also may be listed as TURBODYNE DIV. in some phone books) or calling the factory contacts (Roy Lucas or Gib Helmer) at Area Code (716) 593-1234. In the Southwest (Houston area) the old "TERRY" repair shop is now listed under "DRESSER-RAND".
