## **Background:**

17 & 19 DK/DM Compressors successfully used Quad Rings in the guide vane shaft seal for R-11. When the compressors were made R-123 compatible, the Quad Rings were changed to Neoprene O-Rings.

## **Information:**

RCD presently stocks the O-Ring and Quad Ring. It is preferred that the original Quad Ring (KK74ZW112) be used for all R-11 applications (it is Buna-N, which is not compatible with R-123). The O-Ring (KK71PR015) MUST be used for all R-123 applications.
