**SUBJECT: MICROCOMPUTER CONTROL CENTER  
 (YK CENTRIFUGAL CHILLER) -  
 NEW INTEGRATED HIGH SPEED THRUST COLLAR POSITION  
 AND DRAIN LINE TEMPERATURE PROBE**

On/about October 1994, new **YK** chillers will be shipped with an integrated "PROXIMITY AND TEMPERATURE SENSING PROBE" (025-30961-000) that replaces the Indikon Model 4800 individual components of probe/module (025-30472-000) and Thermocouple (071-01423-000). This new integrated probe performs the same function and has the same electrical connections to the Microcomputer Control Center as the individual components it replaces.

This new integrated probe will also be used as replacement part for those chillers already in the Field that are equipped with the Indikon Model 4800 individual components (Ref. Renewal Parts List Form 160.49-RP3).
