

CYRUS SHANK COMPANY 901M & 903M MANIFOLDS

Our high capacity 901M & 903M manifolds are to be used with our 901 & 903 relief valves. These manifolds are of all steel and stainless steel construction with teflon o-rings on the stem. Due to teflon sealing surfaces the manifolds are rated for 500 ° Fahrenheit and 500# pressure. The construction is the same as our 900MW manifold except the 2" Sch 160 pipe is replaced by a 2" FNPT half coupling. The sizes are as follows:

Part #	Manifold Size	Cv Rating (both ports)	To be used with:
901M	2" x 1 1/4" x 1 1/4" FNPT	47.5	*901 relief valves
903M	2" x 1 1/2" x 1 1/2" FNPT	66	*903 relief valves

*Available with ductile iron (D) or aluminum (A) housing

Weight: 30 lbs

Assembled with (2) 901A or 903A relief valves = 55 lbs

Assembled with (2) 901D or 903D relief valves = 80 lbs

If ordering a 901 or 903 assembly you would receive:

(1) manifold and (2) relief valves .

It would be shipped to you unassembled and would not include the nipples.
