Service Information

File In/With: SJ4, SJ5, SK, SN3, SN4, SN5, SRC, SG	SI0002
	513
Equipment Affected: Large Tonnage and Small Tonnage Chillers	
Oil Shelf Life	

The following is the recommended shelf life for closed container (York brand) mineral and POE oils:

Plastic Containers - 2 Years - Oil stored in plastic containers with a life greater than 2 years must be sampled to assure condition and additional shelf life.

Metal Containers - Indefinite

NOTE: Opened containers (if exposed to the atmosphere) should not be used and must be discarded in accordance with environmentally approved methods.

Work on this equipment should only be done by properly trained personnel who are qualified to work on this type of equipment. Failure to comply with this requirement could expose the worker, the equipment and the building and its inhabitants to the risk of injury or property damage.

The instructions on this service bulletin are written assuming the individual who will perform this work is a fully trained HVAC & R journeyman or equivalent, certified in refrigerant handling and recovery techniques, and knowledgeable with regard to electrical lock out/tag out procedures. The individual performing this work should be aware of and comply with all Johnson Controls, national, state and local safety and environmental regulations while carrying out this work. Before attempting to work on any equipment, the individual should be thoroughly familiar with the equipment by reading and understanding the associated service literature applicable to the equipment. If you do not have this literature, you may obtain it by contacting a Johnson Controls Service Office.

Should there be any question concerning any aspect of the tasks outlined in this bulletin, please consult a Johnson Controls Service Office prior to attempting the work. Please be aware that this information may be time sensitive and that Johnson Controls reserves the right to revise this information at any time. Be certain you are working with the latest information.
